## **Professional Experience**

---

<b>Software Engineer</b>	May 2023 - May 2024
--------------------------	---------------------

### **Nav.it**

*Remote*

- Built REST API endpoints with Django REST Framework for financial goal tracking, implementing filtering, date range queries, and serializers that calculate spending statistics across weekly and monthly periods
- Developed Python REST API clients with pagination and rate limit handling for Smartlook and Intercom platform integrations, implementing incremental sync logic and automated retry mechanisms
- Configured monitoring and notifications using Slack API integration for sync status reporting, deletion summaries, and error tracking across backend services
- Implemented CI/CD automation with Celery and django-celery-beat for scheduled tasks including weekly session syncs, user cleanup jobs, and automated notification delivery with Firebase Cloud Messaging

<b>Software Development Engineer</b>	Jan 2022 - Mar 2023
--------------------------------------	---------------------

### **Amazon.com**

*Seattle, WA*

- Built RESTful APIs and microservices in Java on AWS to support global Prime Rewards promotion tracking, handling billions of requests with low latency across multiple regions
- Developed event-driven serverless workflows using AWS Lambda and DynamoDB, implementing stateless token-based promotion flows with fault-tolerant reward delivery logic
- Created full-stack admin portal with Vue.js and Java backend, enabling non-technical stakeholders to manage promotions and configurations through CRUD operations on DynamoDB
- Collaborated with cross-functional teams using Git for version control, participated in code reviews and sprint planning to deliver scalable features on schedule

## **Technical Skills**

---

**Languages:** Python, Java, JavaScript, SQL, HTML, CSS

**Frameworks:** Django, React

**Databases:** PostgreSQL, DynamoDB

**Cloud & DevOps:** AWS, GCP, Docker

## **Education**

---

### **B.S., Business Information Management**

University of California, Irvine

Donald Bren School of Information and Computer Sciences
