Victor Hidrogo

Seattle, WA | (206) 593-7734 | vhidrogo@uci.edu | linkedin.com/in/vhidrogo

Professional Experience

Software Engineer   May 2023 - May 2024
   Nav.it   *Remote*

- Built REST API endpoints with Django REST Framework for financial goal tracking, implementing filtering, date range queries, and serializers that calculate statistics across monthly periods
- Developed Python REST API clients with pagination and rate limit handling for Smartlook and Intercom platform integrations, implementing incremental sync logic and automated retry mechanisms
- Configured monitoring and notifications using Slack API integration for sync status reporting, deletion summaries, and error tracking across backend services
- Implemented CI/CD automation with Celery and django-celery-beat for scheduled tasks including weekly session syncs, user cleanup jobs, and automated notification delivery with Firebase Cloud Messaging

Software Development Engineer   Jan 2022 - Mar 2023
   Amazon.com   *Seattle, WA*

- Built RESTful APIs using Java on AWS to support global Prime Rewards promotion tracking, handling billions of requests with low latency across multiple regions
- Developed event-driven serverless workflows using AWS Lambda and DynamoDB, implementing stateless token-based promotion flows with fault-tolerant reward delivery logic
- Created full-stack admin portal with Vue.js and Java backend, enabling non-technical stakeholders to manage promotions and configurations through CRUD operations on DynamoDB
- Collaborated with cross-functional teams using Git for version control, participated in code reviews and sprint planning to deliver scalable features on schedule

Business Intelligence Engineer II   Aug 2020 - Jan 2022
   Amazon.com   *Seattle, WA*

- Delivered on-time executive dashboards for Amazon Transportation Services by optimizing SQL queries and data pipelines, reducing query execution time by 30% to meet early-morning SLAs.
- Built scalable data pipelines using Amazon S3, Glue, and Redshift, reducing third-party vendor onboarding time and enabling operational growth through standardized SOPs.

Skills

Languages: Python, Java, JavaScript, SQL, HTML, CSS
Frameworks: Django, React
Databases: PostgreSQL, DynamoDB
Cloud & DevOps: AWS, GCP, Docker

Education

Bachelor of Science, Business Information Management
University of California, Irvine
